Here is a draft of the letter we discussed this morning. We can also attach ADEQ's figure if you want to request additional boring locations at this time.

Wayne,

I plotted some proposed well locations in addition to those proposed by AF on the meeting slides from last week. The pdf includes the maps showing the current NAPL and dissolved benzene concentrations for each zone followed by the proposed well locations. The WORD file was too large to e-mail so it only includes the well location maps so you can move the proposed ADEQ well locations around and/or add others if you want.
